OBJECTIVE

To obtain the job as Senior Backend developer / Team Lead

ABOUT

Working in couple of teams, with different processes. (Scrum, Kanban, Scrumban)

Working on a different kind of tasks :

Supporting legacy systems ,which are written on custom framework

Participating in developing new features.

Developing new features using Symfony / composer / rabbitmq /Vagrant environment

Monitoring:

Kibana (ELK) , NewRelic

Started to investigate how to do NewRelic queries for alerting

Main roles :

- Basically, not constructing the whole project, architecture.
- Participation as the team member to develop features.
- Doing spikes, on the results of which new tasks / tickets are created
- Monitoring / bug fixing

Main orientations :

- Oriented to push ticket to Done - clarifying all dependencies, including other developers / teams
- Continuous learning (on Symfonycast, e.g. Symfony messaging component, DDD patterns, PHP8)
- Communication with business (which are very important) to fulfill thier requirements
- Keep safety on projects (e.g. my opinion - migrating projects to PHP8.0 should be done after we have developers trained and prepared, environments - staging at least, test boxes, local development env are ready. List of breaking changes 7.4 -> 8.0 is taken into consideration)

Technologies:

- RabbitMQ
- MySQL
- REST API -constructing Endpoints on Symfony, querying endpoints of other services
- Elasticsearch - quering data
- PHP7.4

QUALIFICATIONS	<ul style="list-style-type: none"> • PHP, OOP PHP development, SOLID • MySQL, experienced with complex queries • NoSql databases — Mongo, familiar with aggregation framework, Redis • PHP Frameworks Yii, Phalcon, Symfony 3, Symfony 4 • REST web- services • Javascript — jQuery, familar with AngularJs • Application architecture knowledges including design patterns • RabbitMq • Phpunit, Behat • Operation System Linux Ubuntu as preferable operation system • Familiar with Debian server maintenance • Scrum • Git as preferable version control • Vagrant, ansible, docker user • Following PSR standarts • Elasticsearch: 1. Kibana user 2. Build queries for Elastic search (not advanced level) • Nginx, HAProxy, Varnish - can setup with documentaion • CI, CD, TDD • PHPStorm, PhpCS, PhpMD <p>Additional :</p> <ul style="list-style-type: none"> • Scrum / Agilie certificate • setted up Jenkins, for my own experiements, setted up git hooks for CI and different environments
EDUCATION	<div>MS in Computer ScienceSeptember 1997 — September 2001-</div> <div>National Techical University of Ukraine NTUU "TPI"</div> <div>Obtained the MS degree</div>
WORK EXPERIENCE	<div>Check2401.04.2018 — Present</div> <div>Backend developer</div> <ul style="list-style-type: none"> - Working with legacy code - Developing new projects as team player - from planning, then taking part in architecture development, and coding project - Developing vagrant box for project of a company - Working with mail system of company - maintaining and improving, - Working with Emarsys within team ,as team player - Bug hunting - using kibana as tool for analysis <ul style="list-style-type: none"> • Symfony 3/4 • php 7.1 • Amazon S3 • Microservices • Vagrant • RabbitMQ • Elasticsearch • Kibana • NewRelic • <div>FreelanceSeptember 2017 — 01.01.2018</div> <div>WEb developer</div>

- Setting up environments & CI - Docker, Jenkins CI
- Nginx + varnish setup
- Symfony 3.3 & Silex
- API endpoints
- Unit & Functional testing
- Basic VueJs functionality for front- end

Lesara GmbH
Senior web developer

2017 January — 2017 August

Symfony based projects.

- Admin part of the management system (video of them are attached)

- Symfony
- Amazon S3
- Microservices
- RabbitMQ
